What are POWER STRIPS?

Power Strips are a patented transdermal patch fusing wave energy and ancient herbs.

Power Fact: ENERGY

This patented technology and design uses the energy of muscle to jump start and magnify energy, not only to the region, but on a cellular level. Experts believe that health is energy and that we are the account managers, it's about deposits verses withdrawals. Make Power Strips a part of your daily deposits.

Power Fact: ANCIENT HERBS

This unique Ginseng contains Saponin. It is an adaptagen herb that works in harmony with the body where it is needed most: Endocrine System, Immune System, Nervous System, even Cardio, Digestive, and the Metabolism. These specifics have

already been studied and proven internationally. This Korean Red Ginseng is not digested, used, and assimilated well through oral consumption. The Power Strip advantage is delivery!

Power Fact: DELIVERY

There is a buzz in the medical community about using transdermal delivery. The science has not only come a long way but is proven. Our patented exclusive delivery takes the Korean Red Ginseng and a base of a proprietary blend of beneficial minerals for perfect, time-released delivery safely, for maximum benefits!

Power Fact: USAGE & SAFETY

Power Strips are completely safe for adults and children alike. They are to be worn daily between bathing. They are for everyone, to be worn everyday as a health habit. Excellent when placed on the lower back, or where they are needed most. The only caution is in cases of extreme dermatitis.

You will receive your Power Strips in an air-tight mylar bag conveniently tucked into a greeting card.

Dr. Misu Kim

Dr. Misu Kim has a PhD in bacterial resistance mechanisms and is currently conducting research at the Future Engineering Technology Institute of Korea University.

"We face the question of how we live healthier and more meaningful lives, rather than just living longer."
